

Bio-Therapeutic
Skin Care for life inside and out®

technology

out of the room

Tools and Technology of Convenience for
the Forward Thinking Skin Therapist

As technology becomes smaller and more intelligent in every aspect of our day to day lives, it is no surprise that we are seeing this trend coming forward with skin care tools and technology. Whether it be high tech vision visors that now allow the skin therapist to effortlessly examine their client's skin while they work, or the new breed of rechargeable professional battery operated technology that allow the skin therapist the ultimate agility in her environment and budget, there is no doubt that our needs as esthetic professionals are evolving.

David Suzuki
President Bio-Therapeutic

BIO-THERAPEUTIC

Bringing the Treatment Out of the Room!

A big part of this evolution has been spawned by the extremely strong trend of bringing the service literally out of the room. Although historically we have hidden away our secret tools and technology in the dark corners of our service rooms, the future of skin care could not be more opposite. The forward thinking tools and technology of tomorrow's skin therapist are more than efficacious and effective, they are interesting and fashionable; the bling of skin care! Hand held, compact, cordless technology that can be conveniently carried in a skin therapist's tool belt, or positioned near the service chair in a "room-less" service environment are hot! The appearance of a skin therapist greeting her client wearing her high tech attire in itself is a statement; the image is commanding, definite, and confident.

Advanced Technology

The new hybrid innovations of skin care tools and technology represent some of the most technologically advanced ideas and concepts in skin care today, and best of all, they complement and respect the power of touch! By no means have they eliminated the need for full size technology, rather they have allowed an entirely new set of tools to further refine our services and results. Shop smart, as not all products are created equal. Use your logic, and look for the science and the education that supports the technology. Seek out knowledgeable and credible manufacturers and suppliers who really know their stuff when it comes to technology, and most importantly take the time to educate yourself about it. Although the prices for these new exciting tools are certainly attainable, there is no doubt that you will see significant price variances within the market place. Two things that should never be bargained with; your reputation and your business. Simply put, when you are investing in yourself and your business, settle for nothing less than the BEST.

advantages of layering technologies

The concept of layering technology is natural, logical, intuitive, and strategic. It incorporates the philosophy of using multiple synergetic and scientific disciplines together in one service to maximize the results naturally and expeditiously.

Having the ultimate array of technology at your fingertips allows you to create an infinite number of services, each unique to address specific concerns for each client. This uniqueness makes your services one of a kind both by method and result. This ideology is not only proven in regards to the results obtained with your client's skin, but also the growth and success that you can achieve with your business.

What is consistent about the skin is its inconsistency; no two individuals are the same. Each client must have his or her own specific professional recommendations, which in many cases may include as many as five technologies used in harmony. There is commonly a leader in the layering technique; one technology that is deemed as dominant to meet each client's objective. The other technologies are used as accents both before and after the dominant technology to enhance the results.

The layering concept allows for a comprehensive service, as not all skin reacts the same to all technology. By utilizing multiple disciplines together, the end result is improved and the amount of time it required to achieve this result is reduced. An array of technology is also very useful from a marketing standpoint, as it allows a near endless array of services that can be strategically placed on your menu. In addition, it provides your business the opportunity to strike interest with a broader client base. Most of today's well-read and savvy consumers usually have a favorite technology that they have recently read or heard about.

Regardless of which way you slice it, owning one layer or multiple layers of Bio-Therapeutic technology is good business. Possessing the intimate knowledge of how to use each technology individually, and in layered form, is equally as important as having the best made technology in the world. Another reason to choose Bio-Therapeutic as your solution for forward thinking skincare, technology, and equipment!

Bio-Brasion® TRINITY

wet /dry
microdermabrasion

Diamond Tips

5 levels of diamond exfoliation

This advanced technology with manually applied topical solutions is set to redefine and create a new standard and comfort in microdermabrasion services. The unique technology, combined with its superior designed Diamond Tip hand piece, allows the skin therapist to perform the most progressive new service in skin care; layered wet / dry microdermabrasion. A variety of abrasion selections and products allows the skin therapist to quickly perform as many as four passes, creating a unique and exact service to meet every client's objective.

A close-up photograph showing a person's hands holding a blue, handheld device with a white tube. The device is being applied to the lower lip of a woman lying down. The woman has her eyes closed and is wearing a white headband. The background is dark.

bt-accent® AIR

micronized product application

The bt-accent® AIR revives the skin by encouraging the application of advanced products containing the latest, most powerful, and proven ingredients to combat hydration loss, and dull, flaccid skin. The bt-accent® AIR arrives complete with accessories to offer a powerful, stand alone service, as well as the ability to offer individualized accent and add on services to any facial.

A woman with long dark hair is lying in a treatment bed, her head tilted back. She is wearing a white headband. Above her is a large, rectangular LED light fixture mounted on a metal arm. The light fixture is illuminated, casting a bright, multi-colored glow (blue, purple, and red) onto her face and the surrounding area. The background is dark, making the light fixture and the woman's face the central focus.

bt-accent® LED

3 color LED

Accent technology is set to redefine the way you do business. The portable and sleek design is meant to effortlessly assimilate into any service environment. The bt-accent® LED features over 500 red, blue, and combination lights to address a variety of service options.

service options

A combination of the bt-micro® and bt-nano® can be used in or out of the service room. The bt-micro® can perform the entire service or the bt-nano® can be included for advanced skin work. Both technologies will allow for agility and freedom to custom tailor services for each client.

bt-analyze[®]

skin identification

Intelligent Product Choices

Using advanced technology and sophisticated skin membrane sensor, the bt-analyze® uses advanced technology to calculate moisture levels on the skin in multiple zones of the face to clearly define the needs of each area. Each reading is saved and displayed on the intelligent LCD screen so that it can be documented at the end of the analysis. This tool gives quick guidance to clients and begins the process of allowing them to become an active participant in understanding their skin and need for specific products and services to reach their goals. The bt-analyze should be used before each service, as well as after the service, to capture improvements made and to note modifications needed.

Features

- Compact at only 3.5 inches in length
- Weighs less than 5oz
- Battery powered, cordless
- Large skin specific membrane sensor
- Precise measurements with delineation to the tenth
- Easy to view LCD display with 7 memory measurement function
- Protective membrane cap
- Easy to sanitize with disinfectant wipes
- Fits perfectly in the bt-techbelt™
- Clear silicone protective skin

bt-zoom[®]

magnify + illuminate

hand held mag lamp

The bt-zoom® magnifies up to 5x, has 8 clear LED lights to enhance skin details, and 4 UV LED lights allowing for rapid observation of clients' skin. Utilize this system during consultations or in the retail area for product recommendations.

Features

- 8 Clear LED Light Illumination
- 4 UV LED Lights
- Magnification of 5X
- Uses 3 AAA batteries
- Silicone protective skin

A close-up photograph of a woman wearing blue bt-gear glasses. She is looking towards a woman in the background who is out of focus. The glasses have an orange logo on the side that says 'bt GEAR'.

bt-vision[®]

see clear, be clear

Having the ability to analyze the skin at multiple magnification levels with the perfect light every time is key in determining the perfect skin care products and professional services for your client. The bt-vision® is a self lit vision visor that is battery powered, lightweight, features our white light LED illumination system, and comes with range of magnification lenses; 1.2X, 1.8X, 2.5X, 3.5X. This handy tool not only looks intelligent, it is intelligent, and replaces the need for your mag lamp. Additionally, it can be used in the treatment room or out, as well as in the retail area for on the spot skin analysis.

Features

- Cordless, battery powered
- Clear LED Light Illumination System
- Multiple magnification lenses 1.2X, 1.8X, 2.5X, 3.5X
- Will hold two magnification lenses at all times
- Quick release lens system
- 5 way adjustable light
- Head piece is completely adjustable for optimum comfort for all day wear
- Weighs less than 1 pound

bt-sonic[®]

microsonic cleansing brush

dull days are over

The bt-sonic[®] is the latest addition to Bio-Therapeutic's bt-GEAR[®] line. Powerful and portable, this sonic cleansing brush is ideal for both home and professional use. Water resistant and engineered for everyday use, its ergonomic shape is comfortable in the hand. The triangular cleansing head design is thorough and gentle on your skin as the antimicrobial and antibacterial Azul silicone bristles cleanse areas that other brushes simply can't reach. Microsonic cleansing technology has been shown to cleanse 6-8 times better than manual cleansing. The bt-sonic is fun to use, provides a professional quality cleansing in as little as 2 minutes, and leaves skin feeling smooth and radiant.

Features

- Light weight and compact for quick and effective cleansing
- Compact and agile; 1.5" w x 7.1" h
- Powered by 2 aaa batteries (included)
- Weight: 2.8 oz

bt-micro[®]

ultrasonic exfoliation

ultra thin ergonomic design

The bt-micro[®] is the latest in hand held professional technology that offers ultrasonic exfoliation using forward thinking patented technology. bt-micro ultrasonic exfoliation works by creating high speed oscillations, leaving skin smooth, fresh, and perfectly prepared for product application. The bt-micro is powered by a rechargeable battery, compact, lightweight, and is extremely effective as a stand alone tool or used in conjunction with other technology services.

Features

- Weighs 2.7 oz
- Compact and agile; 12mm X 170mm
- Cordless, rechargeable battery system
- Can be used in every facial

bt-nano[®]
mini microcurrent

the perfect anytime facial

The bt-nano is the ultimate mini system, utilizing our exclusive patented Suzuki Sequencing® platform. The bt-nano can be easily held in one hand, and economically placed in or out of the treatment room. It positions perfectly in any environment and setting due to its size, portability, and convenience.

Features

- Compact (takes up less surface area than a 5x7 postcard), convenient and intelligent, weighing in at less than 1 pound
- Battery operated and completely mobile
- Contains Suzuki Sequencing Technology
- Clear silicone protective skin
